Pavlo Piliuiko

Full-Stack Engineer — senior frontend,
working backend

Remote from Khmelnytskyi. Open to full-stack
work: React or Vue on the front, Node or Nest
behind it.

PROFILE

Full-stack engineer, production web and mobile
since 2019. React, Next.js and Vue on the front,
Node and NestJS behind them, carried through to
the database and the deploy rather than stopping
at the API boundary. Physician before engineer,
which is where the habit of reproducing a bug
before fixing it comes from. Claude Code and
Cursor are in the daily workflow; what they
produce is reviewed like any other PR.

EXPERIENCE

Jun 2026 – Present

Full-Stack Engineer · Imrev · govtech

Government services on Vue 3 and Inertia.js, under
load that has consequences when it stops. I own the
frontend architecture and the infrastructure
decisions, and review the PHP, JavaScript and Python
backends on DTO design and service boundaries.

Sep 2024 – Jun 2026

Frontend Engineer · Fintech company (under
NDA) · fintech

Two products on two stacks: one Next.js +
TypeScript, one Vue 3 + TypeScript, sharing a single
component layer. REST and GraphQL against
Node/Express microservices, with the route
and contract design done alongside the
backend engineers.

Jun 2022 – Feb 2024

Frontend Engineer · Uvoteam

Conversion work where every change was measured.
A/B experiments run end to end and read in
Amplitude, Hotjar, GA and Meta Pixel, plus the
framework-agnostic component libraries the product
lineup was assembled from.

fantasy literature

Sep 2021 – Jun 2022

Software Developer · Trive

Next.js monorepos in TypeScript with Redux and Zustand, Draft.js rich text and D3 / react-three-fiber dataviz. Node services on Express and Nest, CMS on Strapi and Directus, and the team's code standards and Cypress coverage were mine to set.

Nov 2020 – Sep 2021

Frontend Engineer · Malevich

React and React Native built to pixel level alongside the studio's designers.

Dec 2018 – Aug 2021

Freelance Software Engineer · Upwork

Client web apps on React with Django backends, starting from hand-written HTML and CSS and growing into full builds. Long-running clients and top feedback scores.

EDUCATION

MD, Vinnytsia National Pirogov Memorial Medical University, 2003–2011.
